The Cochran patent is cited to complete the record.

Claims 11-23 are rejected under 35 U.S.C. 251 as being broadened in a reissue application filed outside the two year statutory period. The changing of the term "and" to "or" in the instant claim is broader than the original claims in the parent patent. If the claims in the grandparent patent were amended to recite "or" instead of "and", them this is improper broadening. It appears that the only difference between the parent and grandparent patents is the range of amounts used. In any event, since the parent patent is tied to the grandparent patent by a terminal disclaimer (Paper No. 5 of parent patent) and the claims differ only in the amounts of tripicolinate and biotin used, the broadening of the claims form "and" to "or" is improper. The "and" requires that both effects be present while the "or" allows either one to be present without the other. Moreover, no indication of separation of the effects is disclosed in either the parent or grandparent patents.

Since the grandparent issued more than 2 years prior to the instant application and since the limitations of the grandparent application overlaps the instant application, broadening is prohibited. (Note instant claims 11 and 12 are directed to the same range included in claim 1 of the grandparent patent 5,789,401).

Claims 11-21 are objected to as failing to comply with 37 CFR 1.173(d) and must be resubmitted in underlined form.
